

ENDURO V 400

End processing machine for the double-sided machining of steel bars

1 Stable clamping device, adjustable opening stroke for reduced cycle times.

Your advantages:

+ Processing operations, such as milling, drilling, centring and thread cutting are carried out **on both sides, in one work cycle, and without manual intervention.**

Custom requests are possible at any time.

Workpiece diameter ranges:

15 - 80 mm
20 - 120 mm

Workpiece length ranges:

2 000 - 6 000 mm
2 000 - 8 000 mm
2 000 - 12 000 mm

Possible operations:

- Squaring
- OD-turning
- Bevelling
- Thread cutting
- Turning round ends
- Thread rolls
- Centring
- Face milling

Enduro V 400

Longitudinal slide unit with a combination tool head for squaring and bevelling.

Longitudinal slide unit for use with thread cutting or rolling heads.

Cross slide unit for face milling and chamfering.

Step chain belt with a longitudinal roller conveyor and left-aligned workpiece limit stop for processing the first side, and a right-aligned workpiece limit stop for processing the second side.

EVERYTHING FROM A SINGLE SOURCE

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects** we are able to offer you not only end processing machines and centres but also the appropriate testing technology to test surfaces and dimensional accuracy and completeness.
