

Double-sided processing of steel bars in just one work cycle

With the Enduro V 400 you save valuable time and increase the efficiency of your production!

Process steel bars on both sides in a single pass – from milling and drilling to centering and thread cutting – fully automatically and without manual intervention.

We are happy to customize the machine to your specific requirements, guaranteeing you maximum precision and efficiency.

Stable clamping device on both sides:
Adjustable opening stroke for reduced cycle times.

For squaring and bevelling:
Longitudinal slide unit with a combination tool head

For use with thread cutting or rolling heads:
Longitudinal slide unit

For face milling and chamfering:
Cross slide unit

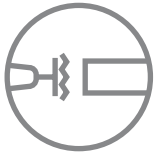

Step chain belt with a longitudinal roller conveyor
for flush left and flush right workpiece attachment

Workpiece diameter ranges	15 – 80 mm 20 – 120 mm
Workpiece length ranges	2,000 – 6,000 mm 2,000 – 8,000 mm 2,000 – 12,000 mm

Possible operations:

- Squaring
- Turning round ends
- OD-turning
- Thread rolls
- Bevelling
- Centring
- Thread cutting
- Face milling

Whether for a tailor-made, complete turnkey solution or individual components – we have the experience and the technology you need!

Processing options:

Spotfacing
Chamfering
Turning round ends
Centring
OD-turning
Tapping
Thread rolling
Face milling

Processing of:

Hydraulic cylinder tubes
Gear shafts
Cam shafts
Gear racks
Crankshafts
Non rotationally symmetric components

Pütz Group – a strong association of specialists.

Our network of experts optimizes your production for maximum efficiency.
